NoWet Waterless Carclean
P O Box 1335
MILTON QLD 4064

Attention: Andrew Zachar

Dear Andrew

NoWet Waterless Carclean has been looking after our fleet of 50 vehicles for past 8 months and I could not be happier with the work performed. Commitment to detailing of our fleet and the professional approach displayed by NoWet franchisees is the service Skillstech Australia have been looking for.

The environmentally friendly products that use no water especially in the drought conditions that we are experiencing in Queensland today are added benefits that make this treatment I believe to be the best available today.

We also received comments from our staff of 800 members and from other departments on the cleanliness and appearance of our fleet.

In the past, Skillstech Australia fleet was cleaned by conventional carwashes and we also tried other waterless car washing products. Based on time since we have introduced NoWet and results achieved, I would not hesitate to recommend NoWet Waterless Carclean service to anyone looking to achieve a high standard for their fleet cars.

Yours sincerely

Scott Carningham
