No Wet Waterless Car Clean

To Whom It May Concern:

Tasman Motorsport V8 Supercar Team has been partnered with No Wet Waterless Car Clean since round 1 of the 2006 V8 Supercar Series.

On track presentation is extremely important to Tasman Motorsport and its partners. The team runs two Holden Commodores and we are pleased to say that No Wet Waterless Car Clean returns that superior shine to our race cars each and every time.

During a race weekend time is precious; having the ability to clean the race cars without water means we can spend time working on the cars.

Tasman Motorsport is proud to be associated with No Wet Waterless Car Clean and has no hesitation in recommending the use of its products to anyone that demands a professional look and feel to their vehicle.

Best Regards,

Nick Ryan
